

The **inductive performance** specialist

Company presentation

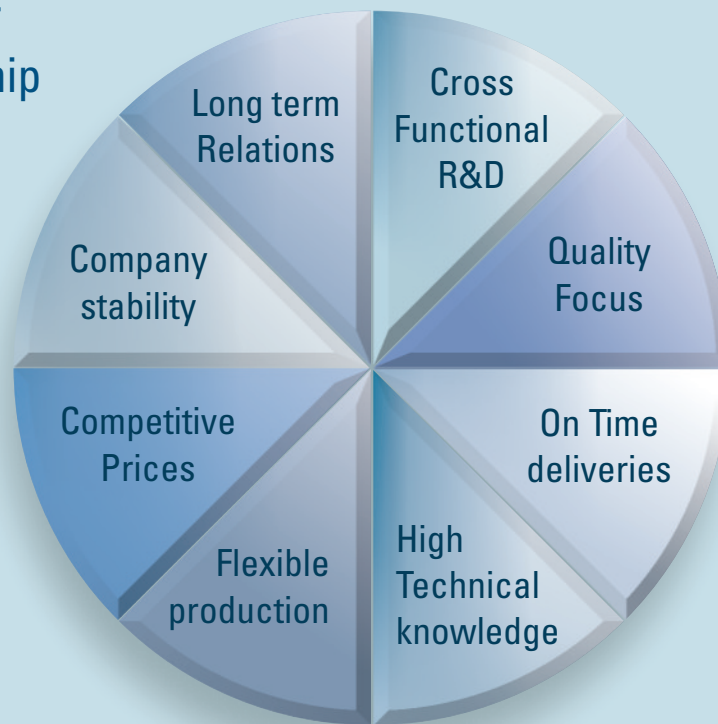

Key Strengths

- World leading technical knowledge
- Wide product range
- High Quality products
- High Quality production facilities
- Long Term relations
- On Time deliveries

Competitive Advantages

- High quality, top design
- Reliable deliveries at competitive prices
- Local engineering
- Global manufacturing presence
- Long Term partners and market leaders
(ZETTLER, NORATEL and FALCO have a well established worldwide reputation)

Customer Partnership Strategy

End markets

We provide solutions across many different market segments

Industrial

Renewable

e-Mobility

Medical

Motor Drives

Ship & Offshore

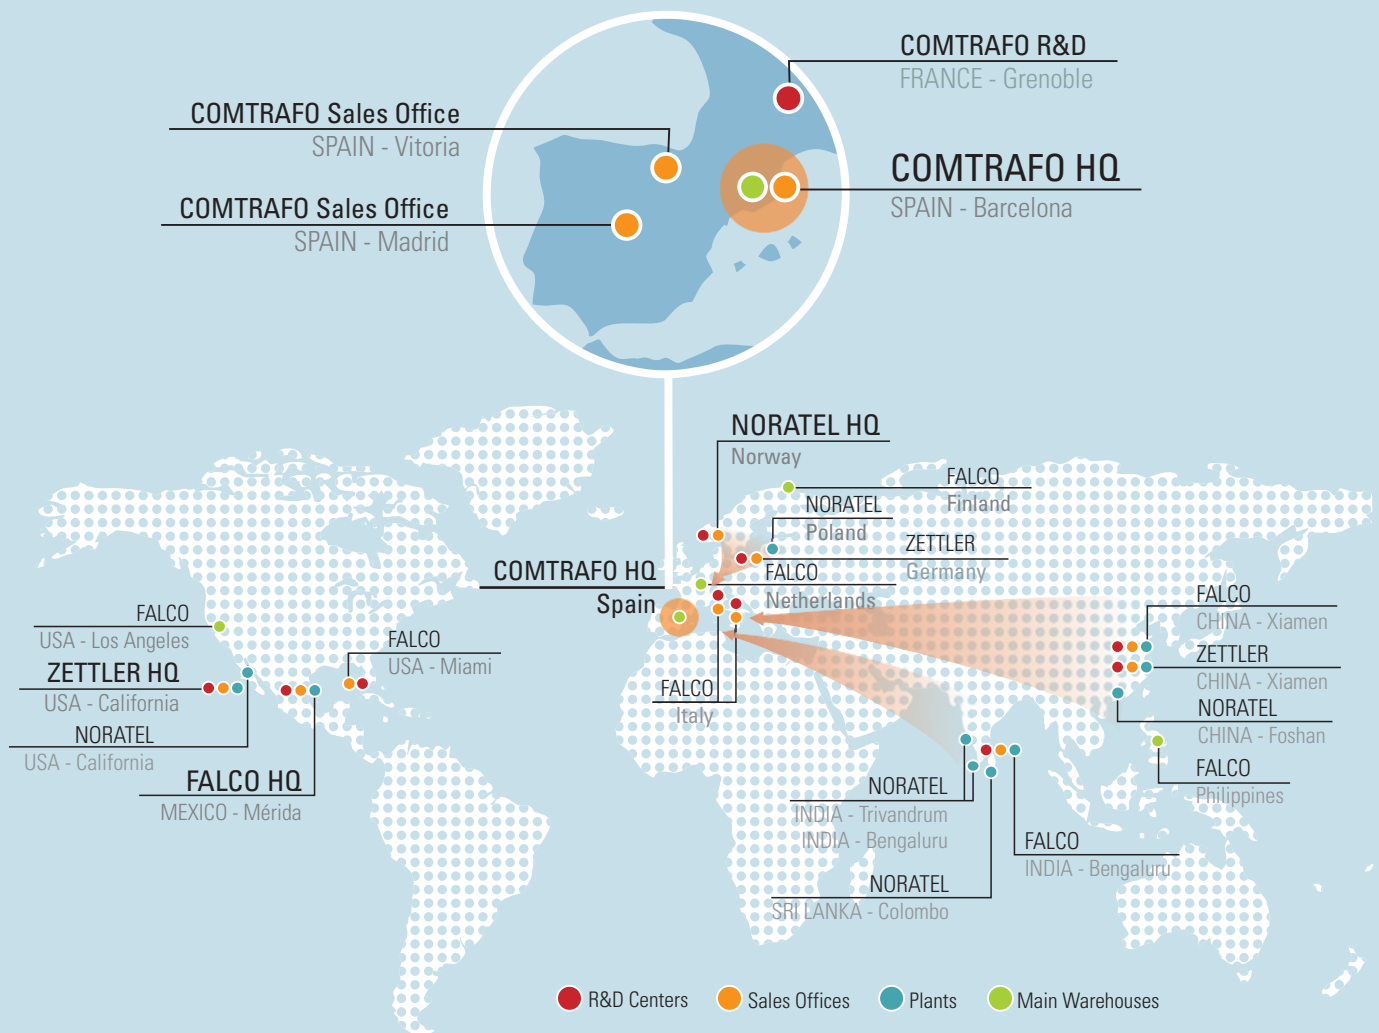

Transport

Audio

COMTRAFO provides solutions for a large range of inductive performance products mainly in the field of Power Electronics

Headquartered in Barcelona (Spain), since 2002 we offer a complete range of **customized designs** on **magnetics products**, in two technologies high frequency and 50Hz, including Power modules (SMPS), power transformers, inductors, chokes and coils, laminated 50Hz transformers, 3ph reactors, liquid cooled chokes and others enabling us to serve a number of major markets like **industrial, transportation, telecom, medical and renewable energy**.

ZETTLER

NORATEL

FALCO
electronics

With a clear focus on **high level manufacturing services** and reliable customized products, today we expand our company to continue developing new solutions to our customers and partners in Europe through our **R&D center** based in Grenoble (France)

COMTRAFO: the inductive performance specialist

INDUCTIVE DIVISION

Creating customised components for growing markets

Our product groups

- Encapsulated & Ferrites for PCB (50Hz / HF)
- Power Modules
- Reactors / Chokes
- Water cooled reactors (AF & WF)
- Magnetic Field Sensors
- Ferrite
- EMI & EMC Filters
- Current Sensors
- Toroidal transformers
- Current transformers
- Power transformers
- Laminated transformers
